Subject: Trivium Packaging's Emission Reduction Targets Receive SBTi Approval, Reinforcing Sustainability Commitment

Information:

Trivium Packaging (Trivium), a global leader in metal packaging solutions, is proud to announce that the **Science Based Targets Initiative** (SBTi) has approved Trivium's near-term science-based emissions reduction target.

In 2021, Trivium Packaging pledged to set science-based targets to help limit the global temperature rise to 1.5°C in the short and long term. In 2022, Trivium adjusted its Scope 1 and 2 emissions reduction commitments from 30% to 42% by 2030. Trivium also introduced a new Scope 3 emissions reduction target of 25% by 2030.

The SBTi has classified Trivium's target ambitions as being in line with a 1.5°C trajectory., this means the goals are consistent with a reduction in greenhouse gas emissions to levels that the latest climate science deems necessary to limit global warming to 1.5°C. The 1.5°C-aligned target is currently the most ambitious designation available through the SBTi process.

"Tackling climate change requires ambitious action from the corporate sector. At Trivium, we believe that quality packaging does not have to be at odds with the planet—and we work hard to demonstrate that every single day. We are proud to have validated our ambitions and plans, in line with the Paris agreement, by the thorough validation process of the SBTi. This is a firm recognition of our commitment to a more sustainable future, now and in generations to come." said Trivium's Chief Sustainability Officer, Jenny Wassenaar.

The SBTi is a global body enabling businesses to set ambitious emissions reduction targets in line with the latest climate science. It is focused on accelerating companies across the world to halve emissions before 2030 and achieve net-zero emissions before 2050.

The initiative is a collaboration between the Carbon Disclosure Project (CDP), the United Nations Global Compact, the World Resources Institute (WRI), the World Wide Fund for Nature (WWF), and one of the We Mean Business Coalition commitments. The SBTi defines and promotes best practice in science-based target setting, offers resources and guidance to reduce barriers to adoption, and independently assesses and approves companies' targets.

For more information on Trivium's sustainability journey please review our [2022 Sustainability Report](#).

About Trivium Packaging

Trivium Packaging is a global supplier of infinitely recyclable, metal packaging for the world's leading brands. Trivium has more than 60 locations worldwide, employs close to 7,500 people with sales of \$3.3bn. For more information, visit www.TriviumPackaging.com
