

# Food Cans

Reliability you can count on.

Through continuous R&D, scalable manufacturing and rigorous testing, Trivium provides food manufacturers with distinctive, high-quality and 100% infinitely recyclable metal packaging that helps your brands stand out.

## Cans from Trivium deliver

- Consistent quality to protect and preserve your products
- Reliable, on-time production without defects so you can keep your business operating at full capacity
- Convenient opening solutions consumers look for

Our cans are available in a comprehensive range of diameters, heights and internal and external coatings. Our offering includes multi- and single-serve use, as well as microwavable cans. Standard diameters range from 202 to 603 and heights from 105.7 to 700.

## Our technology:

Trivium is the pioneer in DWI technology. This manufacturing method offers tremendous potential for down gauging of material, bringing both financial and environmental benefits. We apply either two-piece (DWI) or three-piece technology and we also offer a 'Drawn Re-drawn' ('DRD') technology for cans of a smaller diameter. Trivium operates several DWI plants across Europe and new, state-of-the-art DWI canmaking facilities in the USA.

Using blow molding or mechanical expansion technologies, we offer shelf-differentiating shapes to help your brand stand out.

Don't see the size or shape that you're looking for in our standard ranges? Contact us to discuss your custom needs.
